

Big Tree
SOLAR PROJECT

ConnectGen is developing a large-scale solar farm in western Wyoming County near the border of the Sheldon and Bennington Townships. ConnectGen expects to install up to 175 megawatts (MW) of solar in the area, which has the potential to power over 40,000 homes in New York State.

Why Wyoming county?

ConnectGen has identified the area within the Towns of Sheldon and Bennington for solar development because of its proximity to the existing transmission system, favorable site suitability with limited design constraints, and Wyoming County's history of renewable energy development.

Big Tree Project Area

Preliminary Project Area of Interest

ConnectGen expects to use approximately 1,400 acres in Wyoming County for the Big Tree Solar Project, depending on engineering and environmental considerations.

Local Benefits from the Big Tree Solar Project

Millions of dollars in increased revenue for roads, schools, public safety, and other public services to the Towns of Sheldon and Bennington, Wyoming County and the local school districts

Local construction jobs, revenue to local businesses, and partnerships with local community groups

Millions of dollars in payments to local landowners in the form of solar leases, easement agreements, and good neighbor agreements

About ConnectGEN

Founded in 2018, ConnectGen is a renewable energy company focused on developing best in class wind, solar, and energy storage projects that will increase America's supply of low-cost, domestically produced clean energy.

EXPERIENCE

The ConnectGen team has previously managed the development of four utility-scale wind farms across New York, three of which are currently in operation.

OPPORTUNITY

ConnectGen is in the process of developing three utility-scale paired solar / storage facilities in western New York while also continuing to assess additional opportunities across the state.

LANDOWNER RELATIONSHIPS

ConnectGen's experienced development team has a track record of successfully identifying, developing and constructing renewable energy projects. Our previous project successes have been built on a foundation of strong relationships with the landowners and communities hosting the projects. We are committed to working with landowners, neighbors, and all project stakeholders to safely and responsibly design and build projects that bring long-term benefits to the communities.
